Description: What Doesn't Kill Us, a New York Times bestseller, traces our evolutionary journey back to a time when survival depended on how well we adapted to the environment around us. Our ancestors crossed deserts, mountains, and oceans without even a whisper of what anyone today might consider modern technology. Those feats of endurance now seem impossible in...

Review: Got this book for my birthday, and man has it changed how I view health and the human body in general. It always bugged me in the back of my mind how our ancestors managed to get by without air conditioning and hot showers. When I heard about Wim Hof, I instantly knew that he was on to something with his cold tolerance stuff. Seeing him break the...
